Complete Toolkit

Looseleaf Publishing

The New Generation XML Publishing System

TopLeaf is an XML publishing system that utilizes powerful rendering development to publish complex, highly-styled documents. It can be integrated with DITA and XML editing tools using free plug-ins for XMetal and oXygen. Whether you have a single author, or a team of authors, TopLeaf can get your data where it's needed in a form that maximizes its value.

With TopLeaf composition is fully automatic and can be integrated seamlessly into an existing CMS. It provides a simple point and click interface for stylesheet development, eliminating the need for complex XSLT/FO stylesheets.

Innovative Features

- Design and customize content with stylesheet design tools.
- Auto-generate indexes, tables of contents, PDF bookmarks, cross-referencing and hyperlinks.
- Create outputs from any DITA document instantly with out-of-the-box stylesheets.
- Integrate with XML and DITA editing tools using plugins for XMetal and oXygen.
- Enable loose-leaf publishing with versioning and differencing, release packs, filing instructions, and list of effective pages.
- Experience a point and click interface with stylesheeting; a graphical page layout editor, and automatic stylesheet generation for new document types.
- Utilize CALS and HTML tables, automatic footnotes, side notes, and floats.
- Advanced Mathematical equations and expressions described with MathML are supported.
- Future-proof content automatically.
- Store stylesheets and use them to generate output documents on demand.
- Hyphenation for 30 European languages and more.

TopLeaf excels when XML content must be delivered in several formats and/or at frequent intervals. With TopLeaf you can define the styling requirements for multiple output formats with a single stylesheet in a fraction of the time required by traditional methods.

The TopLeaf dashboard allows multiple authors to access a shared repository. Authors can edit their data and see a preview of the published version through the same intuitive interface. The repository also stores the style information for each publication.

Benefits of Using Orbis Products & Solutions

Turn-Key Systems has a global user community who work with our product developers to improve our products. Our user base plays a critical role in shaping the way we upgrade and maintain our products. All Turn-Key Systems clients have access to a help desk with product documentation and support.
