

How to: Import and use sample stylesheets?

1. When necessary, download and install TopLeaf 10: <https://turnkey.com.au/topleaf-downloads/>
2. Locate the active repository. If you are unsure, it can be manually selected under File > Preferences. The default is the TopLeaf folder created in the user Documents directory

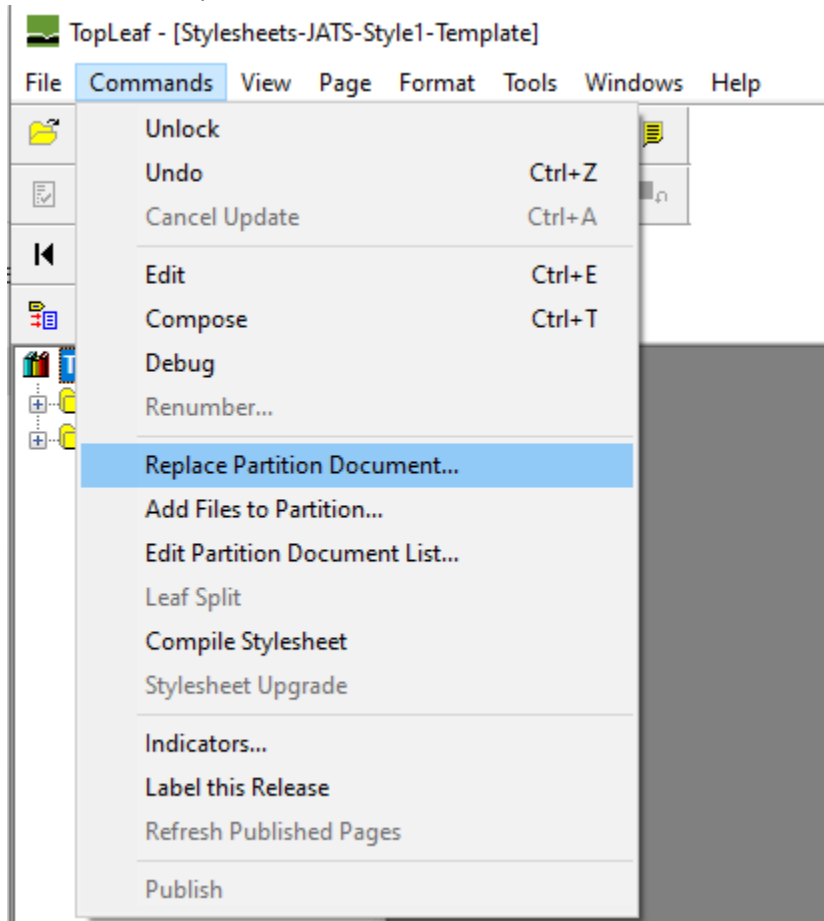

3. Extract the downloaded stylesheets into this repository folder
4. If required install the fonts located inside the resources

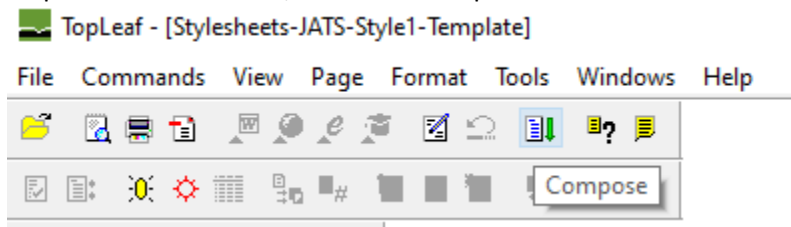

- Open the desired publication with File > Open

- If required install the fonts under the resources folder of the publication
- To replace the default sample data with your own, select the root XML document under Commands > Replace Partition Document

- To preview the content, select the compose action in the toolbar

9. TopLeaf will show a preview of the content. In order to export to pdf, rtf, html, epub or scorm, select the relevant button in the toolbar
